Rock Island, alleging that he had been
maliciously shot. The case went to
the jury early Friday afternoon. This
morning the jurors stood 10 to 2 for
the defendant. "No prospect of agreement," admitted the foreman, and
Judge Whitcom discharged the 12

wedding license obtained in the probate
court, read the parent's consent to the
minor's marriage, and talked the matter over with the county attorney.

"You going to marry this girl, live
with her, and look after her?" he demanded of Mathena.

"Yes, sir," said Mathena, gloomily.

Gregg Is a Topekan.

Emmett Gregg is a Topekan. For eleven years, from 1902 until 1913, he was a special agent at large of the Atchison, Topeka & Santa Fe railway in this city. He worked under H. H. Germain. Prior to that time he was at Guthrie and other Oklahoma points. Late last summer Gregg was made transportation inspector of the southern Kansas division at Chanute. It was rumored in railway circles that the Santa Fe would change the policy of the department under the new management. This was denied at the general offices today. Officials stated that the methods employed in the future naturally would be left to the newly appointed chief but that no sweeping shift was on the program.

The transplanting of German's entire office force, with a few exceptions, to the Rock Island, came as a surprise to the Santa Fe. The city at the present time is without a milk inspector. After the resignation of Dr. George F. Babb, C. H. Kutz took the position for one month. His month was up Saturday. The milk tests for butter fat made by Mr. Kutz, covering the months of both January and February are as follows:

An End To The Curse Of Wearing Worthless Trusses

Here is something absolutely GUARAN-TEED to keep your rupture from coming

And you can try it sixty days—make a thorough prove-it-to-you test—without having to risk a penny.

If it doesn't hold—if it doesn't keep your rupture from bothering you in any way—then it won't cost you a single cent.

to Stand Such a Test
You know as well as we that you can't tell anything about a truss or anything else for rupture merely by trying it on. That's the worst of going to a drugstore or local truss fitter's.

A truss or so-called "appliance" may seem alright when you first put it on, and afterwards prove utterly worthless. The only way in the world you can make sure of exactly what you're getting is by A 60 DAYS TRIAL—A THOROUGH DAY-AFTER-DAY TEST.

And our guaranteed rupture holder—the famous Cluthe Automatic Massaging Truss—is tae only thing of any kind whatever for rupture that you can get on sixty days trial, the only thing GOOD enough to STAND such a long and thorough test.

Exposes the humbug "appliances," "methods," "plasters," etc.

Shows why operation is often a needless gamble with death, and why, if a man manages to get well from the operation, he often has to keep on wearing a truss.

And it tells all about the Cluthe Automatic Massaging Truss and how you can try it sixty days and how little it costs if you keep it.

Gives endorsements of over 5,000 people.
